EDUCATION

Bachelor of Software Engineering

Jan 2023 - Jun 2026

African Leadership University

- Software Engineering Applications
- Machine Learning (ML)

EXPERIENCE

Software Engineer – Bethel Media

Oct 2021 - May 2023

- Developed and maintained 3 scalable e-commerce web applications with modern frameworks (React, Node.js, Django).
- Built backend services and integrated RESTful APIs, improving application performance and reliability for customers satisfaction.
- Implemented database schemas (mySQL, Firebase) and optimized queries for faster data retrieval.

Founder & Software Engineer - QwikAid

Jan 2024 - Jan 2026

- Designed and built QwikAid, a web application that provides faster emergency response for underserved communities - reaching 100+ testers in Rwanda.
- Led a team of 5 engineers to implement backend systems (Django, Celery) for real-time notifications and scheduling.
- Integrated Machine Learning chatbot to answer immediate aid requests for low-end devices .

Machine Learning Engineer - Outlier AI

July 2024 - August 2025

- Labeled, validated, and optimized training datasets to improve the accuracy of LLMs.
- Designed data pipelines and preprocessing workflows for supervised and reinforcement learning.
- Applied ML best practices to evaluate 250+ model outputs and refine annotation guidelines.

SKILLS

Programming: JavaScript, Python, Git, HTML/CSS, Dart

Frameworks & Libraries & Tools: Django, FastAPI, React, Next.js, TypeScript, Flutter, WebRTC

Databases: FastAPI, Node.js, MongoDB, SQL, Firebase

AI/ML: TensorFlow, OpenCV, PyTorch, Hugging Face

Data Science & Visualization: Pandas, NumPy, Matplotlib, Seaborn

Deployment: Docker, Render, Vercel, AWS (basic), GitHub

CERTIFICATES AND ACHIEVEMENTS

- **CodeXtreme Hackathon - 2023:** 1st Runner Up (QwikAid)
- **MedHack Hackathon - 2024:** Participated (Life Prescriber)
- **Certifications:** Skills Acquisition Bootcamp (2020), Code in Place -Stanford University (2023).
- **Awards/Activities:** Most Innovative Intern of the Year - Bethel Media (2021), Top Software Lead (2023), Millennium Fellow (2023)

PROJECTS

- **Life Prescriber v1:** Built a full-stack web application to improve medication adherence through automated reminders and clinician dashboards. **[Django, Celery, Python, JavaScript]**
- **Collab-U:** Designed and deployed a web app helping students and educators collaborate on projects and tasks easily increasing efficiency in task management by 25%. **[React, JSON Server]**
